

Instructions for the Chariot Scene craft

Colour and cut out all your pieces 🌸

Take the 2 characters and if you are using double-sided foam squares, stick them to the back. If not, normal glue is fine. The foam is just to give a 3D effect.

Attach both characters to the background.

Fold along the dotted lines on the scroll like this to create height.

Roll up or wrap round the ends of the scroll. You can use something like a paintbrush handle or pencil like this.

Glue the loose hands on to the scroll.

Glue the scroll onto the characters, like this and you're done!
